Medical Conditions Aggravated by Overexposure:

See Toxicological Information (section 11)

4. First Aid Measures

Eye Contact: Check for and remove any contact lenses. In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. Get medical attention.

Skin Contact: In case of contact, immediately flush skin with plenty of water while removing contaminated clothing and shoes. Get medical attention if symptoms occur. Wash contaminated clothing before reuse.

Inhalation: Allow the victim to rest in a well-ventilated area. If irritation persists, get medical attention.

Ingestion: Do not induce vomiting. Have conscious person drink several glasses of water or milk. Get medical attention.

5. Fire Fighting Measures

Flammability of the Product: May be combustible at high temperature.

Auto-Ignition Temperature: Not available.

Hazardous thermal (de)composition products: These products are carbon oxides (CO, CO2), sulfur oxides (SO2, SO3...), phosphates.

Fire Hazards in Presence of Various Substances: Not considered to be flammable.

Fire Fighting Media and Instructions: Use DRY chemicals, CO2, water spray or foam.

Protective Clothing (Fire): Be sure to use an approved/certified respirator or equivalent.

6. Accidental Release Measures

Small Spill and Leak: Dilute with water and mop up, or absorb with an inert dry material and place in an appropriate waste disposal container. Finish cleaning by spreading water on the contaminated surface and dispose of according to local and regional authority requirements.

Large Spill and Leak: Absorb with an inert material and put the spilled material in an appropriate waste disposal. Finish cleaning by spreading water on the contaminated surface and dispose of according to local and regional authority requirements.

7. Handling and Storage

Handling: Do not ingest. Avoid breathing vapors or spray mists. Do not get in eyes. Avoid contact with skin. Use with adequate ventilation. Wash thoroughly after handling.

Storage: Store at room temperature 25°C (77°F) or lower. Prevent from freezing.

8. Exposure Controls, Personal Protection

Engineering Controls: Use good general ventilation (>10 air changes/hour) and engineering controls (local exhaust, filter's, process enclosures if necessary) to maintain airborne levels below ACGIH Threshold Limit Values (TLV) and OSHA Permissible Exposure Limits (PEL). Ensure that eyewash stations and safety showers are close to the work-station location.

Personal Protection

Eyes: Face shield

Body: Synthetic apron.

Respiratory: Not applicable. Wear appropriate respirator when ventilation is inadequate.
