

OLFA Safety Cutters

Safety for a Lifetime

Industrial accidents are a major concern to OSHA, the insurance industry and business owners. The following statistics from the National Safety Council will help you understand the need for Olfa Safety Cutters in the workplace:

- In 2003 there were 111,100 occupational injuries reported involving cuts, lacerations and punctures (source: National Safety Council® Injury Facts® – 2005/2006)
- 57,280 of these cases were due to hand tools / non-powered cutting tools (source: National Safety Council® Injury Facts® – 2005/2006)
- In 2002/2003 the average incurred cost of injuries related to lacerations, punctures, and ruptures totaled \$10,764 per claim (source: National Safety Council® Injury Facts® – 2005/2006)
- In 2002/2003 the average incurred cost of injuries resulting from cuts, scrapes, and punctures totaled \$13,948 per claim (source: National Safety Council® Injury Facts® – 2005/2006)

Why? The answer is primarily using the wrong tool for the job. Here are the right tools – Olfa Safety Cutters. These versatile, heavy duty knives have spring activated blades that self-retract when the blade slide is not engaged. They all feature stainless steel blade channels. Each knife has unique features which are detailed below:

<p>OLF-SK4</p> 	<p><i>Self-Retracting Safety Knife</i></p> <ul style="list-style-type: none"> • Ergonomic handle • Designed for right- and left-handed users
<p>OLF-SK6</p> 	<p><i>Flex-Guard Safety Knife</i></p> <ul style="list-style-type: none"> • The built-in safety guard is activated once the cut begins to shield the user from the exposed blade edge • If the user takes their thumb off while cutting, the blade will self retract inside the handle once the cut is complete • If the user keeps their thumb on the blade slide while cutting the safety guard will advance and cover the exposed blade
<p>OLF-SK7</p> 	<p><i>Compact Self-Retracting Safety Knife</i></p> <ul style="list-style-type: none"> • Engineered with a low positioned blade slide to reduce blade exposure when carried inside a pocket • Handle made with recycled material
<p>OLF-SK8</p> 	<p><i>Automatic Self-Retracting Safety Knife</i></p> <ul style="list-style-type: none"> • Spring-loaded blade that “clicks” into place when it comes into contact with the material being cut • The blade retracts automatically when it loses contact with the material being cut even when the blade-slide is engaged • Anti-slip, cushion grip handle
<p>OLF-SK9</p> 	<p><i>Self-Retracting Safety Knife with Tape Slitter</i></p> <ul style="list-style-type: none"> • Features a durable rounded metal tip which can be used as a tape slitter, screw driver and staple remover • Curved handle and finger groove on back to help secure grip when cutting.
<p>OLF-SK10</p> 	<p><i>Concealed Blade Safety Knife – Unique 4-Point Adjustable Blade Positioning</i></p> <ul style="list-style-type: none"> • Concealed blade safety knife featuring an adjustable blade positioning design allows for 4 cutting points on a single-edge utility blade • Highly productive, it delivers four times more cuts than a single-edge, fixed blade “gooseneck” safety knife • Uses the OLFA SKB-10 blade, a single-edge blade featuring one blunt edge for safer handling • Acetone resistant for easy cleaning • Fits both right- and left-handed users with no blade adjustment necessary • Tool-free blade change
